Experience

Web developer

БЕЙОНД ДЕЙТА БЪЛГАРИЯ ООД
Sofia, Bulgaria
Sep 2023 – Jan 2024

- Designing, developing and testing innovative web applications using HTML, CSS, and JavaScript
- Continuous and dynamic communication with different members across the team to fully understand project requirements and translate them into technical solutions
- Optimizing performance and ensuring compatibility across different browsers and devices
- Providing technical support and troubleshooting issues as they arise

Web developer

КлаудКарт АД
Sofia, Bulgaria
July 2024 – Nov 2024

- Developing and maintaining the admin panel for e-commerce platform supporting integrated marketing, payment, and shipping solutions for merchants.
- Collaborated closely with cross-functional teams to fully understand requirements and transform them into technical solutions that enhanced the user experience for merchants and administrators.
- Built and launched a dedicated onboarding project for new, simplifying the setup process and improving user engagement.
- Integrated analytics and monitoring tools, including FullStory, Google Tag Manager, and Sentry, for performance insights and improved debugging, allowing for a data-driven approach to user experience optimization.
- Extracted and documented reusable components in Storybook for the onboarding project, creating a consistent, scalable library that streamlined future development.

Some feedback

Stewart Hull · 1st
Senior Fullstack Engineer & Solutions Architect | AI Enthusiast | Public Speaker | Storefront Tech Lead at CloudCart
January 6, 2025, Stewart managed Alexander directly

Alexander is a pleasure to work with on a personal and professional level. At CloudCart he added immense value to our development team through his curiosity, attention to detail and strong systems-thinking mind. He learns quickly, approaches problems systematically and creatively, and is always willing to go the extra mile to get things done on time. Moreover, Alexander communicates extremely well, both in writing and verbally, and he is sensitive of others' time, which shows in his preparation before attending meetings or reaching out to his colleagues. I highly recommend Alexander and think he will add great value to your next project or product development team.
